PROJECTS

ShopaholiCHS: School Merchandise Platform & Admin Portal

- Engineered a modular merchandise e-commerce platform and administrative management portal using Vanilla JS (ES Modules), Vite, Tailwind CSS, and Firebase.
- Implemented domain-gated authentication (@g.batstate-u.edu.ph) to enforce secure student/faculty access and automated unit testing via Firebase Emulators.
- Integrated camera-based QR code scanning for order verification, Cloudinary CDN asset optimization, and EmailJS for automated customer notification workflows.

PalengkeHub: Market Price Monitoring & Ordering System

- Architected a multi-tier public market monitoring platform utilizing React Native (Expo) for mobile users and React / Vite for the administrative dashboard.
- Engineered backend infrastructure with Supabase (PostgreSQL/Auth) and deployed frontend builds and API routes across Cloudflare Workers and Pages.
- Designed relational database schemas to manage stall-level price updates, vendor inventories, and real-time market transparency metrics.

Sip & Savor Spot: Cafe Management & Loyalty System

- Developed a high-performance full-stack web application leveraging Next.js (App Router), TypeScript, and Tailwind CSS, hosted on Vercel.
- Integrated an administrative Point-of-Sale (POS) dashboard, interactive digital menus, hidden menu workflows, and a digital customer loyalty card system.
- Leveraged Supabase for database management, real-time POS syncing, and secure user authentication.
